## PROFESSIONAL SUMMARY

B2B commercial operator with 3 years in corporate banking, closing 9 enterprise deals. Alongside banking, launched two commercial projects from zero to profit and spent the past year building web products and creating content. Looking to bring analytical, commercial, and creative skills to a client-facing tech role.

## WORK EXPERIENCE

### Independent Work & Self-Directed Projects

Mar. 2025 - Present

#### *Self-directed Transition into Tech*

Hangzhou, China

- Built and deployed 3 web apps using AI-assisted development. One is a multiplayer browser game with two themed modes, real-time rooms, decision timers, and handling for host disconnects and bad network. The other two are an interactive birthday gift app and a Japanese kana learning tool.
- Made an original 2-minute stop-motion animation. Wrote the story and hand-drew all 63 frames.
- Self-taught SQL through SQLZoo and LeetCode (basics through subqueries).
- Ran a second iteration of the corporate gifting project (~240 cans of premium nuts), reached a small profit, and tested B2B distribution through community-leader channels.
- Volunteered with Penglai Flower for 2 months on recruitment and intake for at-risk children, then assisted in 3 inclusive classroom sessions for children with autism.

### Wenzhou Bank

Jun. 2024 - Mar. 2025

#### *Relationship Manager, Corporate Banking Department*

Hangzhou, China

- Managed a loan book of ~50 clients (individuals and SME owners) with zero defaults. Ran thorough due diligence: credit reports, bank statements, court records, and on-site visits for business owners.
- Led 4 corporate deals as the primary relationship owner across different industries: two arbitrage clients, one state-owned retail enterprise, one automotive materials exporter. Owned the full cycle from sourcing to close. Coordinated with Risk, Compliance, and International Business teams.
- Co-led 5 more deals with the senior RM under the bank's two-person rule: joint on-site visits, joint negotiations, co-written proposals. Together the 9 deals totaled RMB 460M.
- Built pipeline through leads, self-developed prospects, personal network, referrals from other banks.
- Drove RMB 16M in new deposits and wealth products from existing clients through regular meetings and 8 events (700+ attendees).

### Wenzhou Bank

Jul. 2022 - Jun. 2024

#### *Management Trainee / Assistant Relationship Manager*

Hangzhou, China

- Started with rotations through International Business and Risk Management, where I picked up AML monitoring and cross-border remittance work. Spent the second year as an assistant RM, doing the same due diligence and credit review work I'd later do as a full RM. Led 20+ pre- and post-loan investigations and supported 3 closed credit deals.
- Tracked daily branch performance data in Excel across customer growth, lending, and wealth products. Turned internal policy documents into PowerPoint and ran training sessions for front-line sales teams.
- Wrote sections of the bank's Real Estate Market Report for senior leadership, covering the market overview, 5-year Hangzhou price trends, and a forward outlook.

## INDEPENDENT PROJECT

### Independent Commercial Side Projects

Dec. 2023 - Sept. 2024

- Sold premium pecan gift boxes (6-8 cans each) to ~500 bank colleagues during the New Year season; moved 3,200+ units for RMB 30K profit. Noticed long-tenured colleagues had unused company meal card balances, so worked with the canteen and IT to add the meal card as a payment method.
- Ran weekend pop-up stalls selling fresh flowers and DIY sachets at ¥9.9 each, with small interactive activities to draw people in. Hit 50%+ margin and sold out each time.

## EDUCATION

### Zhejiang University

Sept. 2018 - Jun. 2022

#### *Bachelor, Economics and Management of Agriculture and Forestry*

Hangzhou, China

#### *Chief Director, Campus Music Festival (5,000+ attendees)*

- Secured RMB 100,000 university funding and negotiated in-kind partnerships with 10+ local merchants.
- Negotiated a first-of-its-kind partnership with the PE department, securing formal credit for festival attendance and in-app promotion through the tracking app, driving larger turnout than prior years.
- Led end-to-end planning and execution. Delivered the event with zero community complaints.

## SKILLS

- **Technical Skills:** B2B Sales, Account Management, Negotiation, Pipeline Management, Financial Analysis, Web Development (AI-assisted), Excel, SQL
- **Languages:** Mandarin (Native), English (Professional Working)
